Transforming Cybersecurity with Advanced Intelligence

Adaptive Cybersecurity / Proactive Consulting / Next-Gen Expertise

Why Palo Alto Networks Cortex leads SecOps

As an AI-powered cybersecurity hub, Palo Alto Networks Cortex unifies data, analytics, and responses across security operations. It delivers real-time threat intelligence, enhances incident investigations, and enables proactive defense strategies, catering to the evolving demands of enterprise security.

Outsmart Threats, Not Just Fight Them:

Cortex uses cutting-edge AI to not just detect, but outmaneuver cyber threats, staying ahead of the hackers.

Unify to Conquer: Break down silos in cybersecurity operations, integrating data and tools for a powerful, unified defense front.

Scale Like a Cyber Titan: Empower your cybersecurity to grow and adapt robustly, making your business a moving target for cyber adversaries.

Business Benefits of AI-Driven SecOps

- 1. Enhanced Threat Response:** AI-driven analytics accelerates threat detection and response times, ensuring rapid and effective security measures.
- 2. Proactive Risk Management:** AI-Driven analytics powers proactive risk management, identifying and neutralising threats before escalation.
- 3. Streamlined Security Operations:** A singular, unified platform simplifies management, offering a clearer, more comprehensive security overview.
- 4. Flexible Cybersecurity Growth:** Adaptable SecOps evolves with business changes, providing enduring protection in dynamic environments.

Predict & Solve SecOps Challenges

Stop attacks with full visibility and analytics

Automate incident response and speed investigations

Discover and monitor all internet-facing assets

Delivering AI-Driven SecOps

- Advanced Threat Intelligence Integration:** Integrate powerful AI-driven analytics of Cortex and deliver unparalleled threat detection.
- Real-Time Threat Containment:** Deliver rapid containment of threats by harnessing Cortex's capabilities to block fast-moving attacks.
- Extended Threat Hunting Services:** Leverage Cortex's extended data collection and analysis to conduct in-depth threat hunting operations.
- Simplified SecOps with Unified Platforms:** Consolidate tools with Cortex. Simplify and enhance SecOps comprehensively.
- Proactive Defense with Advanced Analytics:** Blending analytics and behavioral models within Cortex, proactively hunt and predict threats.
- Custom Identity Threat Detection:** Implement Identity Threat Detection and Response from Cortex to build bespoke solutions.

A rare bread in Palo Alto Networks Partner

A cybersecurity pioneer, we have partnered with Palo Alto Networks for over 12 years. Our depth in technical excellence, industry knowledge and strategic alignment drives successful outcomes for a truly diverse range of clients across all industry verticals.

A **Palo Alto Networks Platinum Innovator**, we have a deep understanding and comprehensive technical capabilities across their industry-defining cybersecurity platforms.

Our engineers are recognised as some of the foremost experts in the global Palo Alto Networks technical community.

As the only Australian grown **Palo Alto Networks Certified Professional Services Partner (CPSP)** we are one of the few partners across the Asia Pacific to attain this elite status.

As a CPSP partner you can be confident we adhere to the latest best practice deployment methodologies with the support of Palo Alto Networks expertise and resources.

CYBERFORCE

Palo Alto Network's **CyberForce represents the top 1% of partner engineers**, renowned for their exceptional security expertise and customer-centric approach.

Difficult to achieve and highly valued, membership in the CyberForce program reflects our elite levels of engineering excellence delivering real-world customer success.
