Next-Gen Firewalls

Advanced Cyber Protection at the Speed of Modern Business

Adaptive Cybersecurity / Next-Gen Expertise / Proactive Consulting

Are your cybersecurity defenses proactive or merely reactive?

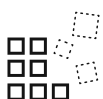

Combine granular user behaviour with AI to scale adaptive security policies that ensures your cybersecurity posture evolves in real-time with the threat environment.

Deploy the absolute industry leader with Palo Alto Networks' Next-Gen Firewalls (NGFW).

Market-leading NGFW capabilities

Threat & Application Control

Leverage AI for real-time threat blocking and control user application usage whilst securing digital assets.

User Policies & Management

Deploy adaptive security policy across users and your distributed workforce with consolidated security management.

Cloud-Ready Security

Scale your security posture and extend robust protection to cloud environments, ensuring data safety.

Technology Features of NGFW

- 1. ML-Based Threat Prevention:** Use AI for real-time identification of zero-day threats and advanced URL filtering to prevent web-based risks.
- 2. Deep Packet Inspection:** Ensure full visibility into network traffic, including encrypted comms, while maintaining high-speed throughput.
- 3. Automated Policy Management:** Utilise deep analytics for policy recommendations and seamless integration with MFA.
- 4. Unified Cloud and On-Premises Security:** Enjoy clear, unified and consistent management across on-prem, cloud, and hybrid environments.
- 5. Simplified Connectivity with SD-WAN:** Incorporates SD-WAN technology, streamlining connectivity and security for branch offices.
- 6. Enhanced & Performant Security:** Deliver high-performance SecOps with active security functions that balance speed and protection.

Gartner®

Recognised as a Leader in 11 consecutive Network Firewalls reports

Palo Alto Networks positioned as a Leader in the 2022 Gartner® Magic Quadrant™ for Network Firewalls.

Why engage Murdoch Webster

Expertise: Our team of experienced and qualified cybersecurity experts can provide guidance on today's best NGFW technology and practices.

Comprehensive Coverage: With care and expertise, we design, deploy, and support all aspects of your NGFW deployment.

Flexibility & Scalability: We right-size your Next-Gen Firewall strategy to scale with your business, ensuring flexibility and adaptability.

Competitive: Tailored to your business demands, we deliver comprehensive, best-in-class solutions affordably.

A rare bread in Palo Alto Networks Partner

A cybersecurity pioneer, we have partnered with Palo Alto Networks for over 12 years. Our depth in technical excellence, industry knowledge and strategic alignment drives successful outcomes for a truly diverse range of clients across all industry verticals.

A **Palo Alto Networks Platinum Innovator**, we have a deep understanding and comprehensive technical capabilities across their industry-defining cybersecurity platforms.

Our engineers are recognised as some of the foremost experts in the global Palo Alto Networks technical community.

As the only Australian grown **Palo Alto Networks Certified Professional Services Partner (CPSP)** we are one of the few partners across the Asia Pacific to attain this elite status.

As a CPSP partner you can be confident we adhere to the latest best practice deployment methodologies with the support of Palo Alto Networks expertise and resources.

CYBERFORCE

Palo Alto Network's **CyberForce represents the top 1% of partner engineers**, renowned for their exceptional security expertise and customer-centric approach.

Difficult to achieve and highly valued, membership in the CyberForce program reflects our elite levels of engineering excellence delivering real-world customer success.
